Network Deployment

You can add Civil 3D Productivity Tools to a Civil 3D Network deployment.

1. Create a base deployment of Autodesk® AutoCAD® Civil 3D® 2015. This should be an out-of-the-box deployment with as little customization as possible other than license information.
2. Create a folder under the **<Deploymentlocation>\<Deployment name>\Img\x64\Components\<ProductivityToolName>**
3. Copy the Civil 3D Productivity Tool to **<Deployment location>\<Deployment name>\Img\x64\Components \<ProductivityToolName**
4. On the workstation where you initially created the Civil 3D deployment, open the Tools folder and double-click the Create and Modify a Deployment shortcut icon.
5. On the Create Deployment > Configure page under Modification Options, select Create a New Deployment Using an Existing Deployment as a Template.
6. Specify a new name for the deployment, review and make any other changes, then click Next.
7. On the Create Deployment > License Agreement page, review the agreement and click Next.
8. On the Create Deployment > Product Information page, review the license information and click Next.
9. On the Create Deployment > Configure <Deployment Name> page, click on Include additional software in the product list to open the Additional software options.
10. Under Additional software click the Add button and browse to the Productivity Tool executable located in the **<Deployment location>\<Deployment name>\Img\x64\Components\<ProductivityToolName>**\ folder.
11. Under "Command Line Parameters", enter /Q to ensure the install doesn't halt your silent deployment.
12. Review and make any other changes, click "Click to close and return to the product list, then click Create. **Now any new deployments of Autodesk AutoCAD Civil 3D 2015 will have the productivity pack applied to them automatically.
